Education

- 2025–2028 M.S., Geology, China University of Geosciences, Beijing (CUGB)
Thesis: *Constraints on the Primitive Magma Source of the Sanjiang Region*
(advisor: Dr. Ze Liu)
- 2021–2025 B.S., Geology, China University of Geosciences, Beijing (CUGB)
Thesis: *Quantitative assessment of zircon depth profiling plateau ages*
(advisor: Dr. Ze Liu)

Research appointment

- 2022–2028 Research Assistant, Mineral Laser Microprobe Analysis Laboratory (CUGB)

Research interests

My research covers geology, mathematics, and geochronology. Focus on:

- Petrology & Geochronology: Lithospheric evolutionary pathways and method development
- Computational geosciences: Mathematical and quantitative approaches to geological mechanisms
- Regional geology: Tectonic and magmatic evolution (e.g., Himalayas, Sanjiang regions)

Publications

First-author or corresponding-author papers:

1. **Wang, Y.**, Liu, Z., Zhang, L. L., Liu, L., Walters, J., Cawood, P. A., Yang, L., Wang, Q., Stockli, D. F., & Zhu, D. C. (2026). Quantitative depth profiling of zircon crystallization histories: New insights into Himalayan magmatic-tectonic evolution. *Journal of Geophysical Research: Solid Earth*, 131(4), e2025JB033324.

Co-authored papers:

1. Liu, X. M., Liu, L., Zhu, D. C., Cawood, P. A., Blum, M. D., Zhang, L. L., **Wang, Y.**, Lu, Y., Wang, Q., Chang, Y. X., & Stockli, D. F. (2025). Erasure of zircon rims by sediment transport after two orogenic cycles. *Geology*, 53(11), 988–992.

Conference abstracts

1. **Wang, Y.**, Liu, Z., Yang, L., Zhang, L. L., Liu, L., Xie, J. C., Wang, Q., & Zhu, D. C. Records of Himalayan orogenic geological evolution: Quantitative insights from zircon depth profiling ages of leucogranites. Chinese Geoscience Union (Oct. 21, 2024)

Invited presentations

- Conference, Chinese Geoscience Union, Records of Himalayan orogenic geological evolution: Quantitative insights from zircon depth profiling ages of leucogranites. (Xiamen, China, Oct. 21, 2024)

Research expeditions

- NW Yunnan (SW China), Volcanic rocks (3 weeks, June, 2025)
- Yanshan (North China), Field geology and mapping (2 weeks, June, 2024)
- Zhoukoudian (North China), Field geology and mapping (5 weeks, July, 2023)
- Qinhuangdao (North China), Field geology and mapping (2 weeks, July, 2022)

Technical skills

- Method development: Automated Depth Profiling Technique (ADEPT)
- Programming languages: R (Proficient), Python, MATLAB, Julia
- Analytical Instruments: LA-ICP-MS (U-Pb dating, trace elements), MC-ICP-MS (Zr, Hf, Sr, Nd isotopes)

Fellowships & Awards

- CUGB Graduate Student Research Incentive Program Scholarship (2026)
- CUGB Top Grade Scholarship (2025–2028, consecutive)
- Xiaomi Scholarship, Xiaomi Corporation (2024)
- National College Student Innovation and Entrepreneurship Competition – Excellence Award (2024)
- Chinese Geoscience Union (CGU) Outstanding Student Paper Award (2024)
- CUGB Professional Scholarship (2021–2025, consecutive)
